## Data Sheet: The Ebema 'Custom Concrete' Paving System

Beautiful as they are, timber decks and porcelain tiles are never going to meet the price and performance requirements of projects which demand far more strength and resilience, for significantly less money. To facilitate these typical 'streetscape' projects, the Alfresco Floors range of Ebema 'custom concrete' pavers is all about looks, performance, value and (unusually in this market) customisation – over 500SqM you can specify your own size and colour, for no extra cost.

We have selected the Belgian manufactured 'Ebema' products for distribution into the UK for many reasons - but most significantly the colour consistency, the live load capabilities and the exacting dimensional accuracy make these the best quality concrete paving and streetscape products that we have found, anywhere in Europe. Our 'off the shelf' collection (always held in stock) includes 3 different surface finishes, 20 standard sizes, 30 standard colours – and is available up to 1m across by up to 80mm deep. Beyond this, bespoke combinations of size and colour are readily available (with nominal set up costs under 500SqM) and, if required, clients can actually design their own unique surface patterns at the Ebema 'Colour Laboratory'.

**The 'Colour Laboratory' at Ebema's HQ in Belgium, where clients can spend the day experimenting with over 200 different aggregates to create pavers with their own bespoke colours and surfaces.**

The two most popular commercial surfaces from Ebema are Rockstone and Carreau – both available in all the colours and sizes most suited to large scale, high traffic, public space paving projects. In addition, Ebema also produce a high-spec domestic paver called Megasmooth, which can be specified just 40mm thick and up to 1m wide.

Ebema is a family run business with over 70 years' experience in the design, development and production of concrete pavers and streetscape accessories. Ebema have supplied their products to commercial and residential sites all across Northern Europe and they have refined the look and quality of their pavers all along the way. It's a combination of experience, aesthetics and efficiency that has made them immensely successful in mainland Europe. To keep pace with current demand for their products over there, they recently invested

€20m in a massive new manufacturing and storage facility - from where they can produce pavers in vast numbers (at very competitive prices) and from where we can deliver stock items to the UK just a few days after receiving an order.

# Ebema Sample Colours Gallery

Carreau- Gris Naturel

Carreau – Marbre Brun

Carreau – Marbre Gris

Carreau – Tricolore Cendre

Rockstone – Blue Steel

Rockstone - Diamond

Carreau - Nuance

Carreau - Rouge Noir

Rockstone - Ivory

Rockstone - Maroon

Carreau - Cedar Dust

Carreau - Mocca Dust

# Alfresco Floors

Hard Landscaping, Made Easy...

The Ebema paving collection is distributed nationally across the UK by Alfresco Floors. For more information email [info@AlfrescoFloors.co.uk](mailto:info@AlfrescoFloors.co.uk) or call us on 020 8977 0904

## Company Background:

Alfresco Floors are based in West London and work nationwide. We concentrate exclusively on exterior hard landscaping. We specialise in the supply of 20mm porcelain tiles, concrete paving, or timber and composite decks. We usually install this as raised floors on terraces and balconies, or as commercial hard landscaping.

Alfresco Floors offer technical design consultancy, material supply, in-house installation teams, or usually a 'turn-key' combination of all three of these services.

The people at Alfresco Floors have a long and well respected track record of over 25 years in exterior floors, all over the UK. During this time we have become familiar with all manner of materials, all sorts of technical challenges, and just about every 'raised floor' installation system. As a direct consequence of this practical, first hand experience, we now focus our efforts exclusively on carefully selected products and solutions that we know offer the best combination of price, prestige and practicality.

In addition to projects which use just one of our four exterior materials (porcelain, concrete, timber or composites) we also cater for the growing trend towards 'hybrid' hard-landscaping, where architects and designers are looking to combine mixed materials in more elaborate layouts. To facilitate this, the materials and installation systems we supply have been chosen to work together technically and aesthetically.

Our aim, wherever possible, is to provide an easy, comprehensive 'one stop shop' for architects and designers. By selecting one of our integrated Alfresco Floors systems, you will simplify what might otherwise have been a much more complex combination of landscaping product requirements, sourced from several different suppliers.

Currently we import and supply three complementary systems in our exterior range; **AirScape** (20mm porcelain paving on height adjustable pedestals), **Ebema** (off the shelf or bespoke concrete paving) and **Grad** (hidden fixing, clip grip decking).
